# The Covert Security Sensors Keeping Your Assets Safe

**ALARMTRACK™** is a covert monitoring system which employs a revolutionary new tracking technology working to TWO GPS Satellite systems with **TWICE** the normal coverage.

Ultra-low power consumption ensures a battery life of one to four years, and the ability to work in hidden positions.

This means the ALARMTRACK™ sensor can be fitted in moments, and forgotten for complete peace of mind.

## Powerful, Simple & Affordable

Have all the information you need at your fingertips 24/7

**QUICK & EASY TO INSTALL**  
Simply place and trace

### 1 PLACE AND TRACE

We will send a reassurance position from your asset once a day that you can view online or via a smartphone app. Great peace of mind at low cost.

### 2 SET MOVEMENT ALERT

via your phone App. You will be notified by text and email if your asset moves without authority. Powered by Telstra.

### 3 ALARMTRACK™ RECOVERY

can be switched remotely into 30 second interval live tracking and reporting – a recovery mode to get your property back if the worst happens.

### 4 NEVER GIVES UP

will report successfully where other wireless devices just give up.

### 5 LOW SIGNAL AMPLIFICATION

enables operation where normal units fail (eg. in a container stack or underneath a trailer).

### 6 FUSS-FREE 24/7 TRACKING

installed in moments and fully transferable to where your need is greatest. Just place and trace.

## Fuss-Free Asset Protection for only \$149\*

Plus your choice of  
**PRE-PAID  
DATA PACKAGE**
