

No Installation Required
Built-in Duress Alarm
Portability Keeps Remote Workers Safe

TRACK IN A BAG™ is a top-of-the-range tracking device that is capable of being installed in a vehicle or carried in a portable configuration.

It will operate off the 3G/4G cellular network and fall back on the Iridium SBD when out of range.

1 ALWAYS TRACKING

TRACK IN A BAG™ will automatically switch over to Iridium satellites when cellular coverage is not available. Provides real time data on the location of staff. Chooses the most economical and effective system available. Can be installed in vehicle.

2 MONITORS & ALERTS

Monitors the safety of people in remote areas with SOS Duress Alarm Button and accident or rollover detection. Alerts by Email if regular check-in schedule is missed. Security Monitoring Room 24 hour service available.

3 FULLY FEATURED

TRACK IN A BAG™ can hold hundreds of geo-fences to implement arrival or departure alerts, and can detect harsh driving events for sophisticated driver profiling.

4 FEATURES

IP67 Rated Housing. 7.4V 2 cell LiPo battery pack for extended operation. DC Harness for connection to Cigar Lighter.
